The comments further amplify this positive sentiment, as they are filled with compliments and affectionate expressions. Phrases like "Girl, you

Post 5

Caption: Question - Gurudev, In the Basic Course of @ArtofLiving, you tell us to 'Accept people and situations as they are'. Can you please explain where exactly we need to apply this knowledge? @Gurudev Sri Sri - You don't need to accept people who love you. There is no question of acceptance there. The challenge if there is any is to accept those who hate you. There are some people because of their ignorance they don't like you. They don't know you and so they don't like you. What can you do? You just accept it. If you don't accept them it will bother your mind. So just accept them as that's how they are. It's a role that they are all playing. In this world of millions of people it is not necessary that everybody should like you. There can be someone who doesn't like you. So accept and save your own mind. If they don't like you, it's their problem, not yours. Question - Gurudev, @ArtofLiving Advanced Meditation Program is a journey from head to heart. What is the place of logic in spirituality? @Gurudev Sri Sri - Logic has a very important place. It is through logic only that you get into spirituality. Logic makes you see what is life and what is the world and how you are wasting your time! A logical mind says, 'no, I should not waste my time. Life is short, everything is ephemeral.' There is no point in worrying about the past or brooding about the future; this is logic. So logic gives you a step into spirituality and so logic is important. But it only a step, you can't sleep on the step. You have to enter the house. So it is the first step to enter the home. Question - Gurudev, Which one should I follow, the head or the heart? @Gurudev Sri Sri - Sometimes your head and sometimes your heart. When you do business follow your head, and when you are doing service then follow your heart. When you are enjoying your life, follow your heart, don't sit and calculate at that time. It is okay to calculate when you are with a customer. But if you start calculating with your friends or family, you'll make them miserable. #happinessprogram #artofliving #artoflivingcourses #pujyagurudevssrisriravishankarji

Caption Sentiment Analysis: The sentiment of the provided text is predominantly positive and reflective. 1. ****Acceptance and Understanding****: The initial part of the text discusses the importance of accepting people as they are, particularly addressing the challenge of accepting those who may not like you.

The comments express a mix of appreciation and personal connection to the themes presented. Phrases like "A favourite ❤️" and "Cherish the moments 💜🤩" convey warmth and affection. The mention of

Post 7

Caption: 'I Am a Secret Society', acrylic on canvas, 11" x 11" x 11". 🔥👁️🔥 An older set of pieces I finished and sold a few years ago; three levels of acrylic on canvas paintings, magnetically connected. I think about these paintings a lot, and especially as life goes on; as I see the layers in my own mind and in the collective consciousness, and the way these affect or co-create each other. I believe that full self-love requires self-trust, and also that for a people (or the world) to love itself, it must trust itself. The current paradigm likes to make us think that we can really only trust in secrets and the power that comes from these, but there is another way, which is the way of truth, knowledge, and wisdom, shared and integrated within and shared between individuals. No revolution worthy of higher causes can function without shared knowledge and the continuing free education of all. Whatever happens for good or evil contains information, and any piece of information can lead to revelation. But there are levels, layers, details, and these comprise the whole. Stay tuned. Pay attention, balancing skepticism and faith. How shall we learn from each other best? ✨
